

Sensitive content is just gone. **Period.**

The Redact-It® Enterprise Server uses our patent-pending technology to remove sensitive content and privacy information as an effortless part of your business processes. Redact-It works with any format and creates a PDF, TIFF or CSF rendition of the redacted file, leaving the source document untouched.

Redact-It supports any document type, including Adobe PDF, TIFF and Microsoft Office formats.

Redact individual documents on-demand in an automated workflow process or redact entire folder hierarchies as a batch process. Use complex expressions to automatically redact all instances of a phrase, name, social security number, phone number, account number, monetary amount and more. Or, redact predefined block out zones on common image document types. Redacted content is actually removed in the output file, not just covered. And no hidden text, document properties or other metadata is transferred to the redacted file.

Redact-It®

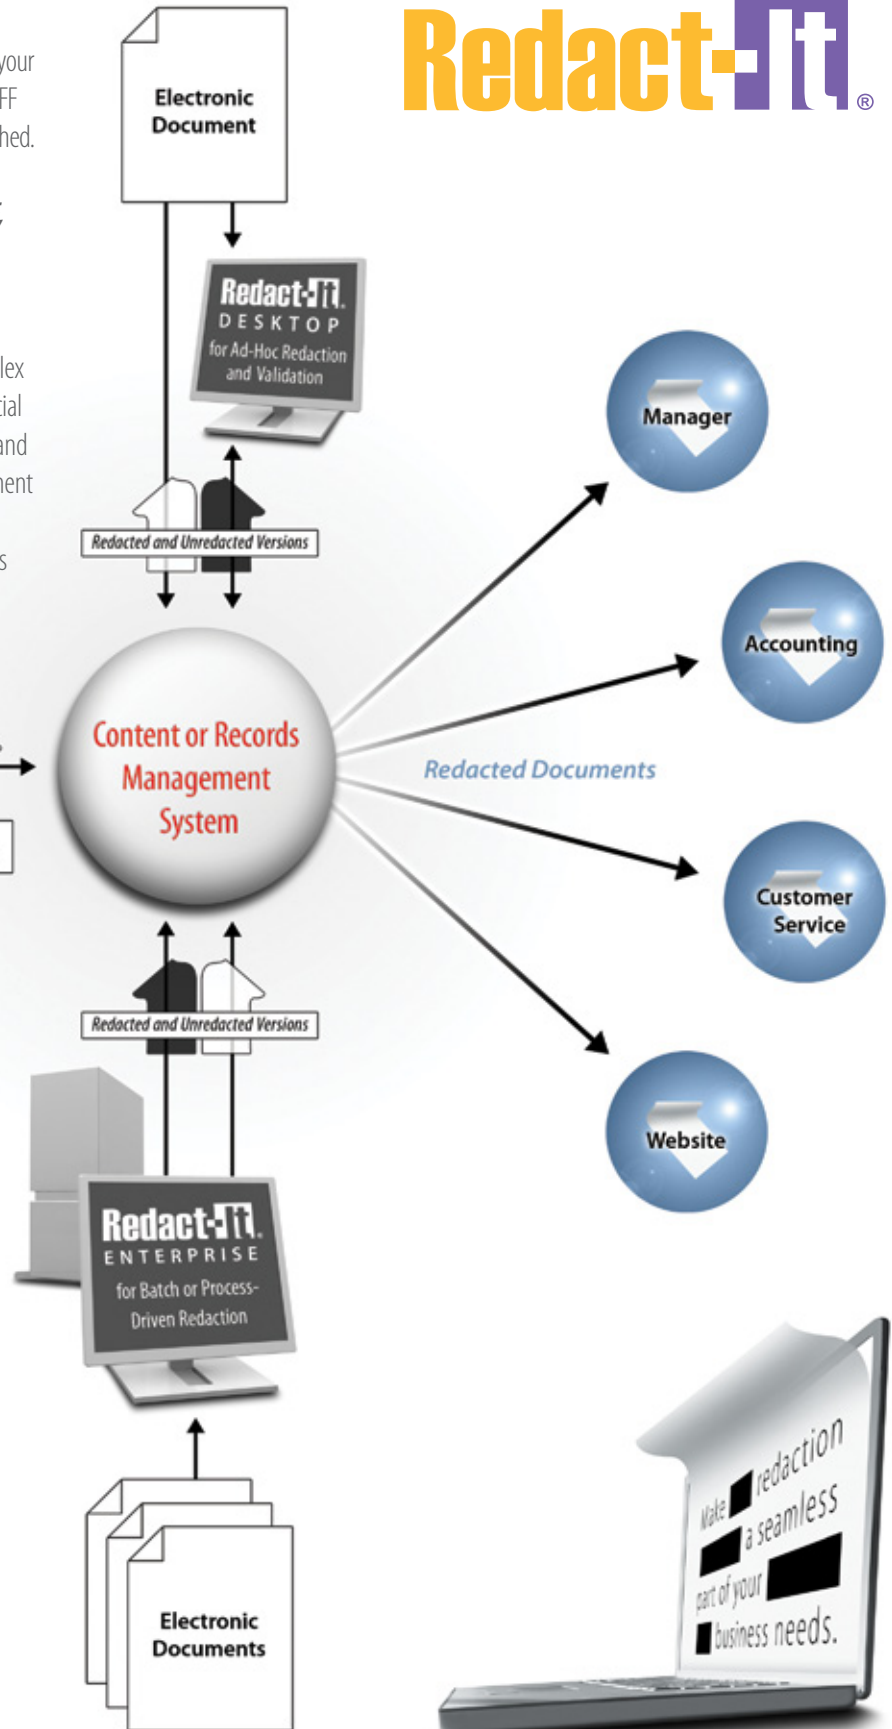

Redact-It Uses

- Achieve regulatory compliance for information sharing
- Remove private information from public records, court documents, insurance, medical or financial records and more
- Batch-process archived/existing documents
- Automatically redact documents for use by organization role as part of your business processes
- Securely share documents anywhere

Redact-It Advantages

- Supports any format
- Redact to TIFF, PDF or secure CSF
- Redact by text list, text patterns or zones
- Completely removes redacted content
- No metadata transferred to output file, so there is no hidden text to worry about
- Add exemption codes (reasons for the redaction)

How Redact-It® Works

The Redact-It Enterprise Server can monitor a directory (including subdirectories) for files to process, or it can be integrated with existing systems to redact files as part of your business processes. Redact-It is capable of handling any demand load.

Text-based redaction

Create a simple text file containing all of the phrases you need to redact.

Text pattern recognition

Redact-It comes pre-loaded with standard text patterns so you can automatically redact all instances of standard items:

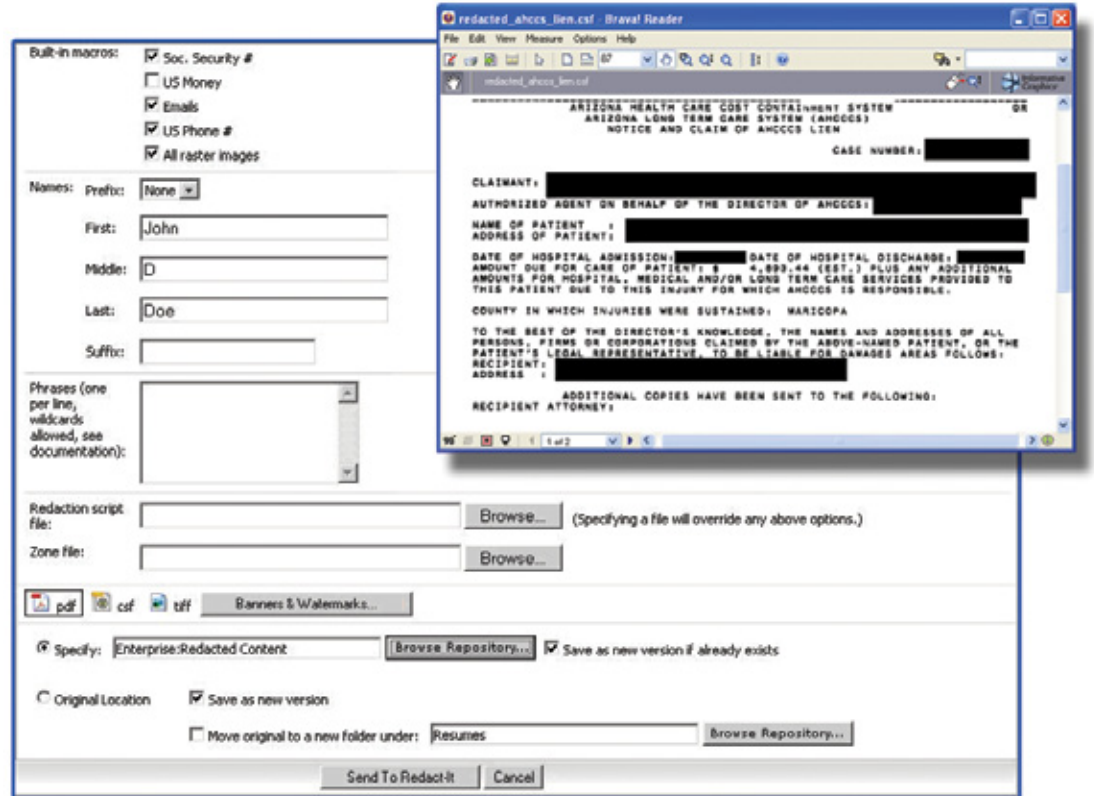

- All variations of a person's name (John Doe, John D. Doe, Mr. Doe, etc.)
- Social security numbers
- Phone numbers
- Email addresses

You can also create custom pattern searches for any business need, such as account or ID numbers.

Zone-based redaction

Redact-It can also perform zone-based redaction.

Useful for scanned documents, such as contracts or standard forms.

- Redact-It never alters the source file
- Redact any format, including PDF, Word and TIFF
- Redact to TIFF, PDF or secure CSF
- Completely removes redacted content
- Add reason for redaction
